**Cell: D11**

**Comment:** Rick Heede:

Coal production by coal mining companies and state-owned enterprises, including subsidiaries of oil and gas companies.

Coal types produced are not ordinarily reported by coal operators (except for metallurgical coal). We distinguish, where possible and reasonably well known, between hard (bituminous and subbituminous) and soft (lignite or peat) coals, especially for the larger companies operating in regions such as Australia and India where soft coals are predominant. Soft coals have lower carbon content per tonne than do hard coals.

**Cell: G54**

**Comment:** Rick Heede:

[www.murrayenergy.net](http://www.murrayenergy.net):

"Murray is the largest privately owned coal company in America. Producing approximately 30 million annual tons of bituminous coal that provides affordable energy to households and businesses across the country. We have eight (8) underground and surface mining operations, plus 40 subsidiary and support companies."

**Cell: G55**

**Comment:** Rick Heede:

[www.murrayenergy.net / history](http://www.murrayenergy.net/history):

"Murray Energy Corporation began in 1988 with the purchase of a single continuous miner operation having an annual output of One Million Tons per year.
