See Russian Federation for coal production 1992-2010

Also see Kazakhstan and Ukraine, 1992-2010

Kuznetz coal basin
Coal production by coal mining companies and state-owned enterprises, including subsidiaries of oil and gas companies.

Coal types produced are not ordinarily reported by coal operators (except for metallurgical coal). We distinguish, where possible and reasonably well known, between hard (bituminous and subbituminous) and soft (lignite or peat) coals, especially for the larger companies operating in regions such as Australia and India where soft coals are predominant. Soft coals have lower carbon content per tonne than do hard coals.

Soviet production includes Svalbard production-sharing with Norway (~0.4 million tons per year).
