Oil and natural gas production is detailed from 1949 to 1991 and from 1956 to 1988 (for natural gas; Gazprom production from 1989 to 2010). The later Russian Federation dominated oil and gas production in the Former Soviet Union. Natural gas production was 82.3 percent Russia in 1992 (Turkmenistan, Ukraine, and Uzbekistan accounting for most of the rest). Oil production was 89.4 percent Russia in 1992 (Azerbaijan and Kazakhstan accounting for most of the rest). See Tables for 1991 and 1992 oil and gas production by nation-state on page 2.

Note: while Oil & Gas Journal gas production estimates agree well with GazProm data, OGJ100 are low for oil production (OGJ100 2006-2008 ~248 million bbl per year). CMS uses GazProm data.

Felder data for Russian oil production (left) and gas production (right). Note Felder data in column "L".
